

## **Entry Level Industrial Hygienist**

### **About the Company**

Founded in 1983, Sandler Occupational Medicine Associates, Inc. (SOMA) is a leading occupational health (OH) and industrial hygiene (IH) consulting firm with staff located in multiple states of the US. We provide our clients with solutions to their occupational medical and workers' health and safety concerns. We combine our experienced and nationally recognized staff, advanced information technology solutions and state-of-the-art equipment with established evidence-based practices to provide our services effectively. Our business is expanding and we require additional industrial hygiene support. SOMA offers a competitive salary, extensive benefits (for full-time employees) and a flexible and casual work environment.

### **Education/Experience:**

SOMA is seeking candidates for the following position:

- Entry level industrial hygienist, with **1 to 3 years** of field experience and a B.S. or M.S. in IH, Engineering or other related sciences. The candidate should be legally authorized to work in the US. This position will start as a part-time position during the probation period of 3 months and may develop into a full-time position, contingent upon the performance of the candidate. Fresh graduates or those expecting to graduate by Dec 2022 are welcome to apply. Candidates located in mid-America to western part of America or willing to relocate is a plus but candidates in other locations will also be considered based on their qualifications.

### **Skills Required for the Position:**

- ❖ Motivated, dependable and hard-working individual
- ❖ Team player as well as able to learn on-the-job and apply the principles independently
- ❖ Good communication skills
- ❖ Ability to manage time and fluctuating workloads efficiently
- ❖ Familiarity with Google environment

### **Areas of Responsibility - Full-Time Position:**

Responsibilities will include evaluating chemical and physical hazards in occupational environments. We envision the candidate spending time working on multiple on-site sampling surveys including projects at aggregate industry, utility plants, manufacturing sites and other industrial facilities. Our ideal candidate will be required to travel to sites throughout the U.S. about once or twice per month for projects requiring 3 to 4 days on-site. Other work will include coordinating & planning the sampling surveys, lab communication, recording survey findings, reviewing the sampling results, preparing technical reports, client communication, calibrating and maintaining sampling equipment and assisting with other projects assigned. Up to 50% travel is required.
