

Field Safety Manager

We're looking for an experienced and motivated **Field Safety Manager** to join our growing team in the utility and civil construction industry

The safety manager will be responsible for ensuring workers on construction projects maintain the highest level of safety. The role of a Construction Safety Manager is crucial in ensuring the safety and well-being of all construction workers. They are responsible for implementing safety policies, conducting site inspections, and educating workers on safety protocols.

Location: Maryland, Washington and Virginia

Type: Full-Time

Industry: Utility & Heavy Civil Construction

The ideal candidate will have:

- Minimum **5 years of field safety experience**
- **OSHA 500 Certification**
- **Bilingual in English and Spanish** (Preferred)
- Hands-on experience in **underground utility work**
- Strong communication and leadership skills
- Familiarity with **DOT compliance**, OSHA recordkeeping, and Miss Utility process

Key Responsibilities:

- Conduct **field safety audits**, inspections, and job site visits
- Enforce company safety policies and OSHA regulations
- Lead **weekly safety meetings**, toolbox talks, and new hire orientations
- Perform and document **incident and near-miss investigations**
- Monitor and manage **Miss Utility ticketing and clearance coordination**
- Conduct **shop and yard inspections** to ensure safe practices and conditions
- Ensure safe material handling, equipment use, and PPE compliance
- Collaborate with project managers, superintendents, and foremen to address hazards
- Support safety training efforts and track certifications for field crews
- Maintain OSHA logs, safety documentation, and assist with insurance claims
- Assist with fleet safety programs and DOT roadside compliance efforts

If you're passionate about safety and want to make an impact in the field, **we want to hear from you!**
